

PROF. HENA PRAMOD

Adjunct Associate Professor

PRONOUNS

she / her / hers

SUBJECT AREAS

Biology
Nutrition
Anatomy & Physiology

EDUCATION

MS, Microbiology, Bharathidasan University
BS, Microbiology, Bharathidasan University

TEACHING LOCATIONS

Manama, Bahrain

EMAIL

hena.pramod@faculty.umgc.edu

I have been working with UMGC since 2009. I teach Biology, Nutrition and Biological Sciences like Human Health and Diseases, Human Biology, Biology of Cancer, Anatomy & Physiology & Microbiology

I began my career as a Microbiology, Immunology, and Biochemistry Lecturer. I have also worked as a Clinical Microbiologist and as a researcher. As a PhD scholar, I have experience in gene analysis and pioneering methods to combat bacterial resistance. I'm currently researching bacterial bioremediation and the detoxification of recalcitrant effluents.

I am deeply passionate about exploring the realms of Naturopathy in Holistic nutrition and the complex interactions of gut microbiota.

I am driven to teach by my passion for learning and the profound sense of satisfaction I derive from positively influencing the lives of my students. I embrace an analytical and inductive approach to teaching, prioritizing the development of a strong instructor-student relationship.

I'm passionate about bringing colors to life through painting and crafting, expressing myself through dance, and losing myself in the rhythm of the music.
