I have been teaching Italian Language and Culture for UMGC since January 1984 and in that time I have met many students. All of my students have left something with me and I am still in contact with students that I taught years ago. Many of them still use Italian expression that they acquired in my class!

Learning a language is a great enrichment for the person and if a student finds the right class environment, they will really enjoy it. In my classes students talk, laugh, and have a good time because they live the language!

In my free time I read, watch movies and cook Italian food. I also like to take pictures of people and places.

Currently I also teach Italian to immigrants as a volunteer.

Ci vediamo in classe!

Arrivederci!
