

PROFESSOR WILL TENNEY

Collegiate Associate Professor

Teaching is not just about assignments on the syllabus or capstone projects at the end of a course. Rather, teaching is about widening perceptions and fostering self-growth. Professor Tenney believes that outstanding teachers broaden students' conceptions of their abilities and enable them to surpass their education goals.

Professor Tenney has taught for UMGC Europe since 1992 and has zigzagged throughout Germany, the Mediterranean, the United Arab Emirates and Afghanistan. He has a keen understanding of the challenges UMGC Europe students face and as such tries to cultivate a safe space for students to learn and grow. For him teaching is about relationships. Teaching is one of his passions, and he finds it very fulfilling to help students achieve their educational goals.

In addition to teaching, Professor Tenney loves windsurfing and hiking. He hits the mountains for day hikes whenever he can and gets excited about windy days with big waves.

SUBJECT AREAS

Statistics
Mathematics

EDUCATION

MS, Mathematics, University of North Carolina at Chapel Hill
BA, Philosophy, Kenyon College

TEACHING LOCATIONS

Rota, Spain
